

Define Problem team wish to solve

- Why does my solution/project need to exist in this world?

The violence perpetuated by Boko Haram(BH) and Islamic State in West Africa has devastated much of North East Nigeria during the past ten years. Lack of employment and Livelihood opportunities, particularly for young men and women, is a major grievance and cause of insecurity underlying the crisis in Northeast Nigeria.

The main constraints driving low yields of crops include low use of Agricultural inputs and poor knowledge of Good Agricultural Practices (GAP) by Farmers as well as poor understanding of market opportunities by Farmers and agricultural input companies.

1. Our Team will explore Farmer oriented input distribution schemes that embed Good Agricultural Practices into process of Agricultural input delivery.
2. We will develop a system where Farmers can easily access Good Agricultural Practices and Market Information on mobile devices.

- Why are we building it?

To solve the challenge low yields that Farmers experience as well as provide means of sustainable livelihood for all and sundry. When young men and women are productively engaged, It will lead to massive reduction in insecurity.

- Who needs our solution?

Farmers,(Young men and Women)., Private Agricultural Extension Service Providers and Agricultural Development Programmes of Government
